SNEHA DUBEY

PRODUCT OWNER | DIGITAL PRODUCTS | AI & AUTOMATION | DIGITAL TRANSFORMATION

Bengaluru, India | snehadubey463@gmail.com | snehadubey1401.github.io

PROFESSIONAL SUMMARY

CSPO-certified Product Owner / Product Analyst with 3+ years of experience delivering enterprise digital products, platform transformations and AI-enabled solutions at Philips Healthcare. Progressed from software engineering into product ownership, with hands-on accountability across discovery, product requirements, roadmap and backlog management, user stories, acceptance criteria, UAT, release readiness and stakeholder alignment. Combines technical fluency with customer-focused product thinking to translate complex business needs into scalable, measurable outcomes across global teams.

CORE PRODUCT & DELIVERY SKILLS

PRODUCT MANAGEMENT
Product discovery • Product vision • Roadmap contribution • Product lifecycle • Backlog ownership • Feature prioritisation

AGILE DELIVERY
Epics • User stories • Acceptance criteria • Sprint planning • Backlog refinement • Release planning • UAT • Agile/Scrum

STAKEHOLDER & CUSTOMER
Stakeholder management • Cross-functional workshops • Customer journeys • Requirements elicitation • Global collaboration • Executive presentations

DATA & QUALITY
Google Analytics • Product tracking • Functional validation • Defect triage • Test scenarios • Release validation

AI & DIGITAL TRANSFORMATION
AI-enabled workflows • Process automation • Enterprise CMS migration • Platform consolidation • Operational efficiency

TECHNICAL FLUENCY
Contentful CMS • AEM • Figma • Azure Boards • Eloqua • SFMC • React.js • React Native • Java • Node.js • APIs

PROFESSIONAL EXPERIENCE

Philips Healthcare | Associate Product Owner / Product Analyst
Aug 2023 – Present

Enterprise Digital Transformation | AEM to Contentful | Sleep & Respiratory Care

- Owned end-to-end product discovery and delivery for a global CMS transformation, converting business requirements into epics, user stories, acceptance criteria and actionable backlog items.
- Led requirements, scope clarification and dependency management for the migration of approximately 25 B2B/B2C templates, partnering with Product, Engineering, UX/UI, QA and business stakeholders.
- Shaped complex content and form journeys using Eloqua, Salesforce Marketing Cloud and Philips library integrations; defined dynamic URL patterns to support localized experiences while preserving untranslated URLs where required.
- Protected business continuity by enabling the Sleep & Respiratory Care business to move from AEM to Contentful while retaining IT support and avoiding a potential $3M licensing exposure.
- Owned functional validation and UAT from test scenario design through stakeholder sign-off, defect triage and closure; supported release planning, launch readiness and post-release issue management.
- Served as Google Analytics SME for dynamic tag management, improving tracking clarity and supporting data-informed product decisions.
- Facilitated stakeholder workshops, product walkthroughs and prioritisation discussions, balancing customer value, business impact, dependencies and technical constraints.

AI SMART FACTORY | OPERATIONAL EFFICIENCY

- Owned product requirements and workflow improvements for an AI solution that surfaced previously resolved factory issues and recommended actions to operators.
- Coordinated iterative testing and feedback cycles; the solution contributed to an approximately 30% reduction in factory operator Andons.
- Presented the solution and business impact to global leaders and received recognition for the work.
- Created rapid proofs of concept, including an Azure Boards prototype that translated delivery data into plain-English views of risks and completed work.

Philips Healthcare | Application Developer
Jul 2022 – Aug 2023

- Developed features for Philips CT and MR learning applications, including history, push notifications, user-interface enhancements and application improvements.
- Built a working knowledge of software architecture, APIs, user experience and engineering constraints, strengthening business-to-technology trade-off decisions in later product roles.

SereneTech | React Developer Intern
May 2022 – Jul 2022

- Developed reusable React-based user-interface components, integrated backend APIs and improved authentication flows and user experience.

DazeInfo | Digital Marketing Intern

Jun 2021 – Jul 2021

• Supported digital marketing research, campaign planning, design coordination, publishing and performance analysis.

SELECTED PRODUCT IMPACT

$3M	~25	~30%
Potential licensing exposure avoided through platform transformation	B2B/B2C templates migrated through development, QA and release	Reduction in factory operator Andons supported by the AI solution

EDUCATION & CERTIFICATION

RV Institute of Technology & Management | Bachelor of Engineering, Information Science

CGPA 8.5 / 10

Certified Scrum Product Owner (CSPO)

TOOLS & TECHNOLOGIES

Contentful CMS • Adobe Experience Manager (AEM) • Azure Boards • Figma • Google Analytics • Eloqua • Salesforce Marketing Cloud (SFMC) • React.js • React Native • Java • Node.js • REST APIs

TARGET ROLES

Product Owner • Associate Product Owner • Digital Product Owner • Technical Product Owner • Product Analyst
